## ABOUT

Final year B. Tech Computer Science & Engineering student with a strong interest in technology and innovation. I enjoy learning about software development, embedded systems, and data-driven solutions. I am passionate about applying my technical knowledge to real world projects and continuously improving my problem-solving and programming skills.

## EDUCATION

2023-Present

### HINDUSTAN INSTITUTE OF TECHNOLOGY AND SCIENCE

Bachelor of Technology Computer Science and Engineering

CGPA: 9.5 (Till Semester 6)

2024-Present

### INDIAN INSTITUTE OF TECHNOLOGY MADRAS

Degree program in Data Science and Applications

CGPA: 8

Gateway International School (CBSE)

12th Grade: 83%

10th Grade: 95%

## INTERNSHIP COURSES

### Intern | Edunet Foundation (in Collaboration with AICTE)

July, 2025 – August, 2025

- Developed a predictive modelling solution using IBM Cloud, applying AI and Cloud Computing concepts learned through IBM SkillsBuild modules such as Getting Started with AI and RAG Lab.
- Implemented data analysis and model training techniques, and used GitHub for project management and version control.

## Artificial Intelligence with Python

Completed an internship on Artificial intelligence with python October 2024 with Coincent. Understanding AI systems using Python, and popular libraries such as TensorFlow and Keras. Understanding and implementing AI solutions across various domains.

## MongoDB

The MongoDB course taught the fundamentals of MongoDB, a NoSQL database. Covering topics like database creation, data modelling. Understanding how to store, manage, and retrieve data efficiently using MongoDB.

## PROJECTS

### Predictive Maintenance of Industrial Machinery | Internship

Developed a Random Forest model to predict machinery failures using real-time sensor data. Deployed on IBM Cloud for maintenance insights and improving fault detection.

### IoT-Based Smart Plant Maintenance and Watering System

Built an IoT system with Blynk IoT, and Arduino IDE to monitor soil moisture, temperature, humidity, and animal movement. Irrigation system with real-time dashboard, alerts, and manual override.

### AI-Driven Voice-Based First Aid Assistant

Built a voice-based first aid assistant using speech recognition and text-to-speech to provide real-time, hands-free emergency guidance.

## SKILLS

**Proficient in:** Programming in C & C++, Python, Data Structures and Algorithms, HTML, Java, SQL, Microsoft Office, Artificial Intelligence, Internet of Things (IoT).

**Soft Skills:** Communication, Problem-Solving, Team collaboration, Adaptability, Critical Thinking.

## LANGUAGES

- English
- Tamil
- Hindi
